This seems like a fairly typical computer programmer position. Provided you make less than the salary cap, you are entitled to overtime. The salary cap is \$112,320 if you work a 60 hour week.

## Software Engineer, Google.com Deployment - Mountain View

### Positions based in Mountain View, CA.

#### The area: Google.com Engineering

With analytical and code-level troubleshooting abilities to spare, Google.com's engineers are technology whizzes who love being in the center of the action. We tackle a range of complex software and systems issues, including monitoring, responding to and safeguarding the availability of our most popular services.

#### The Role: Software Engineer, Google.com Deployment - Mountain View

Google is looking for experienced Software Engineers with hands-on experience in configuring systems and networks, to help launch exciting new products.

Members of the Google.com Deployment team actively engage with product development teams as they complete the design process, advising and assisting them in integrating their products into Google's production environment. New hires or team members must quickly learn the intricacies of our proprietary deployment infrastructure and use that knowledge to rapidly deploy new Google services into datacenters. In this role they will partner with numerous software developer teams across the breadth of Google's global R&D team, and help them launch ground-breaking products to millions of users across the world. Their coding skills will be called upon to improve our deployment software and to assist with product and infrastructure development.

#### Requirements:

- BS in Computer Science.
- 3 to 6 years of hands-on systems software development experience or equivalent experience in system administration in a Linux or Unix environment.
- C, C++, or Java coding experience is required.
- Experienced system administrators with very strong scripting skills (Python, Perl, bash) and automation experience will also be considered.
- Prior experience developing web applications or enterprise software systems is a plus.
- Good verbal and written communications, with the ability to rapidly learn and explain technical concepts.
- Initiative, leadership, and proven ability to work in a team.
